

Lark Lane Pharmacy

42 Lark Lane, Portland
Account LLP-0042
Ordered 4 June 2026
Collection by the patient

Five items for one patient, ordered together

All five are continuations of an existing regimen and none is a new start. **One item carries a check** and is marked as such in the margin; the rest can be prepared and labelled from the directions opposite without contacting the clinic.

Metformin 500mg tablets

168 tablets
56 days' supply

One tablet three times daily, with meals

Continuation, unchanged for eleven months. Label with the standard gastrointestinal advice and note that the dose is taken with food rather than before it.

Atorvastatin 20mg tablets

56 tablets
56 days' supply

One tablet at night

Continuation. No change of strength or brand. Patient has asked for the same manufacturer as the last supply where that is possible.

Ramipril 5mg capsules

56 capsules
56 days' supply

Check before dispensing

One capsule daily, in the morning

The strength has changed from 2.5mg to 5mg at this order. Confirm the patient understands the change and has not been left holding the old strength. Blood pressure was reviewed on 2 June and the change is intentional.

If the patient believes the dose is unchanged, do not dispense and telephone the clinic on the number below.

Ferrous fumarate 210mg tablets

112 tablets
28 days' supply

One tablet twice daily, with a vitamin C drink

Second course. Counsel again on the darkening of stools and on separating the dose from tea and coffee, which the patient reported forgetting during the first course.

Colecalciferol 800 unit capsules

56 capsules
56 days' supply

One capsule daily

Continuation from the winter review. No counselling needed beyond the label; the patient has taken this for three years without issue.

Before you dispense

Recorded here so the order carries its own checks.

Allergies

None recorded. Confirm with the patient at handover.

Owings

Nothing outstanding from the previous order.

Collection

By the patient, with photographic identification.

Interactions

Screened at the clinic on 4 June; none flagged.

Substitution

Generic acceptable on all five items.

Next order

Due 30 July. Nothing to prepare before then.

Dr Alex Rivera · 4 June 2026

Queries to the clinic on **0000 000 0000**, weekdays 08:00 to 18:00, quoting the order reference above. Out of hours, hold the item rather than dispensing against an assumption.

This order replaces SB-DO-2026-0651 of 9 April in full. **Nothing from that order remains outstanding**, and any part of it still held should be returned to stock rather than dispensed alongside this one.
